

Personal Reference

To whom it may concern,

I have worked with Andrei Alexandru since March 2025, during which time Andrei has served as an AI Developer reporting into my area. In this period, Andrei has:

- Work on Multiple AI projects within our organisation
- Played a key role in the implementation of our AI development framework
- Helped the business in the journey of implementing AI at RLB
- Presented at our annual conference demonstrating the art of the possible

Andrei has proved to be a key part of our AI Development team, not only developing solutions to request issues but also educating the business on what is possible using artificial intelligence, being the catalyst for a change in how we do our business.

During his tenure at RLB, he has engaged with business users of all levels of seniority and has quickly become our SME on AI and how we should use it in our business.

Additionally, he has recently taken the role of mentor/line manager, helping new employees to settle into our business and understand the basics of AI Development.

Andrei would be an excellent addition to any team – personable, knowledgeable and always happy to help.

If you require further details, please feel free to contact me directly.

Sincerely,

[William Kitcher](#)
